

Product data sheet

BKD 150-E-WE

BKD 150 System insert with interchangeable insert

Advantages and use:

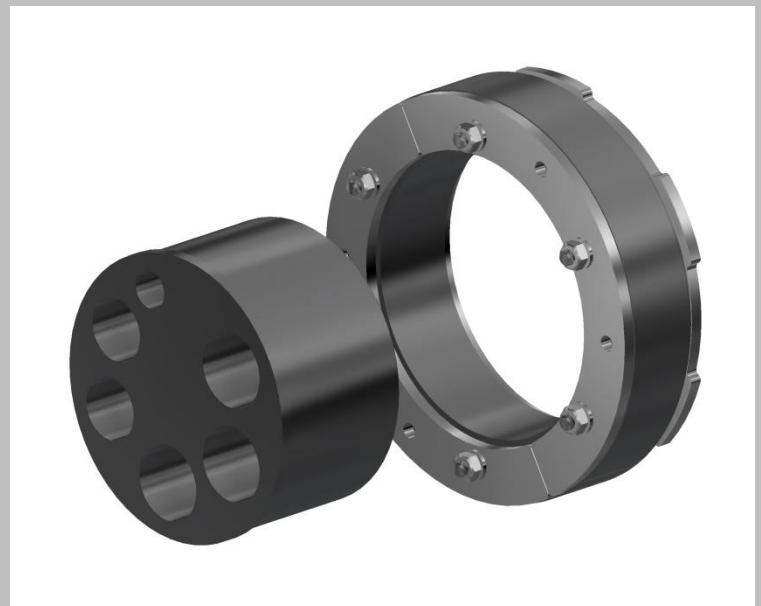

- Ideal system insert for installation in sealing sleeve of the BKD150 and HSI150 systems
- Easy installation due to latching
- Split insert for assembly after cable laying of outer ring and interchangeable insert
- interchangeable insert with individual assignment for your application
- Bayonet locking for protection against migrants
- Simple fixing in bayonet sealing sleeve by means of jointed face-hole wrench (GSS) via mounting holes in the press plates

Technical details:

- Gas- and watertight up to 2 bar
- Metal press plates 5 mm
- Threaded bolts and nuts M8
- Specially adapted rubber blanks (34 mm width)
- Interchangeable insert with 60 mm rubber width
- Interchangeable insert with individual assignment
- Pressing of the rubber by tightening the clamping nuts

Material specification:

Metal press plates (V2A or V4A), rubber blanket (EPDM), threaded bolts and nuts (V2A or V4A), interchangeable insert (EPDM)
